Christmas Tree, Wreaths & Greens Care

Keep your tree, wreaths, and greens fresh all holiday season with the right preparation and care!

PRESERVATIVE SPRAY

- **Lock moisture into the needles** of trees, wreaths, and greens with this non-toxic, waxy anti-transpirant spray.
- **Choose Garden Center application** before delivery, or buy it to DIY at home.
- **At home, apply outdoors**, away from patios, as the spray can stain surfaces.

STAND & WATER

- **Choose a sturdy stand** that holds plenty of water—we recommend Cinco stands, and we install them for free!
- **Cut 1 inch** off the trunk base before attaching the stand so the tree can take up water.
- **Fill the stand with warm tap water** as soon as the tree is in place.
- **Check water often** for the first few days, and refill as needed.
- **Add preservative** to the water to maintain freshness.

DELIVERY & LOADING

- **Book early**, as delivery dates are limited.
- **Choose White Glove Delivery** at any Garden Center. It includes delivery, placement in your home, and plugging in the lights.
- **Transport it yourself if you prefer**. Our staff will secure the tree to your roof rack.

SAFETY

- **Limit lights to three** connected strands.
- **Unplug lights** when the tree is unattended and at bedtime.
- **Keep fire hazards away** from the tree, including candles and fireplaces.
- **Ask about our custom tree lighting service** to save time and stress.

PICKUP & RECYCLING

- **Book end-of-season Tree Pickup** early to minimize mess and hassle.
- **Recycle greens** at any 7 Dees Garden Center for a fee. They are composted off-site.

FLOCKED TREES

Fresh-cut, green trees are sprayed with a non-toxic, non-allergenic, fire-resistant flock of fluffed cellulose wood product for a snowy effect!

- **Skip the water.** Water in the base makes the flocking sweat off the needles.
- **Skip the stand.** Flocked trees come with theirs already in place.
- **Use lights with white cords** instead of green, or let us light your tree before you bring it home.
