

DESIGNING A SUCCESSFUL Container Garden

1

CONTAINER

Sets the tone for your planting—consider size, shape, material, and style

2

THRILLER

Typically the most striking element in the container, adding height and drama

3

FILLER

Accent plants that provide the bulk of texture and color in the container

4

SPILLER

Plants that spill out of the container, creating length and softening the edges

Container Success Tips

- Plant in containers at least 12 inches in diameter
- Proper drainage is a must!
- Use fresh, high-quality potting soil
- Water daily during the hottest months
- Fertilize monthly with 50/50 mix Portland Rose Society 15-10-10 and G&B Organic Paradise 5-5-5
